

NIVED SUNIL

Engineer - Artificial Intelligence & Machine Learning

✉ nivedsunil03@gmail.com ☎ +91 9074450184  linkedin.com/in/nivedsunil  github.com/nived1277

ABOUT ME

A recent B.Tech graduate in Computer Science and Engineering (AI&ML), with hands on experience building CNN-based diagnostic system and deploying LLMs (Gemini, Gemma) in production style application. Skilled in Python, Pytorch, end-end model deployment. A quick learner with strong analytical thinking, eager to apply my AI/ML skills and contribute to building intelligent, real-world solutions in a growth-oriented organization.

SKILLS

Programming Language : python, JavaScript, C

ML/DL Frameworks : PyTorch, TensorFlow, scikit-learn

Database Version : SQL, SQLite

Tools : Git, GitHub

LLM/GenAI : Google Gemini API, Ollama (Gemma)

Data & Analysis : Pandas, NumPy, OpenCV

Web/API : FastAPI, HTML, CSS. JavaScript

EDUCATION

Sree Buddha College of Engineering, Alappuzha, Kerala | 2022-2026

Bachelor of Technology in Computer Science (Artificial Intelligence & Machine Learning)

Senior Secondary, Sree Narayana Central School (CBSE)

Biology - Maths

PROJECTS

1.AI Based Medical Diagnosis Assistance

Created an AI system that helps diagnose diseases using patient symptoms, lab results, and medical images (MRI and X-ray). Used CNN models and a simple user interface to make medical diagnosis faster and more accurate.

2.Predictive Maintenance Intelligence Stack (PMIS)

Proposed and developed a unified intelligence stack designed to standardize predictive maintenance protocols across heterogeneous industrial sectors. Engineered a modular framework integrating real-time sensor data with domain-specific AI models to provide a cross-sector diagnostic layer. Addressing fragmentation in industrial AI by providing a scalable “Intelligence Stack” for Aerospace, Automotive, and Manufacturing.

3.FutureMe AI

Developed an AI-powered web application using Python, FastAPI, HTML, CSS, and JavaScript that enables users to interact with a simulated future version of themselves through personalized conversations and growth timelines. Integrated Google Gemini AI to generate intelligent future-self responses, designed RESTful APIs using FastAPI, and built an interactive frontend with dynamic timeline visualization to help users explore future goals, milestones, and personal development pathways.

4.ResQ – Offline Disaster Response Assistant

Developed an offline disaster response platform powered by Gemma 4 through Ollama, delivering AI-driven emergency guidance across floods, earthquakes, cyclones, and medical emergencies without internet dependency. Built a conversational assistant providing step-by-step safety instructions, first-aid recommendations, and preparedness guidance backed by local SQLite and JSON-based storage. Deployed through a responsive React and Tailwind CSS dashboard with modules for emergency shelters, survival guides, and checklists, ensuring reliability in low-connectivity and disaster-affected environments.

CERTIFICATIONS & TRAINING

- **AI for Data Analysis** (Google - Coursera, May 2026)

Gaining hands-on experience in AI-assisted data analysis, data visualization, and insight generation from datasets.

- **Data Analysis with Python** (IBM - Cognitive Class, Nov 2025)

Gaining proficiency in data manipulation, analysis techniques, and Python-based tools for deriving insights from data.

- **Full Stack Web Development with AI Tools** (Edunet Foundation / AICTE, 2025 - 2026)

Completed a Student Development Program on Full Stack Web Development with AI Tools under AICTE's Next Gen Employability Program, building skills in modern web development integrated with AI technologies.

- **AI and Robotics Training / Stem Robotics, Kochi | JUNE 2025**

Gained experience in applied AI and robotics through a two-week internship. Developed practical skills in deploying AI models and programming robotic systems.

CAMPUS ENGAGEMENT

Media Lead

- Led media planning, content creation, and social media strategy to increase audience engagement and event visibility.
- Captured and edited professional brand photography for marketing, social media, and promotional use.
